

Training Courses and Covid-19

Although we are mindful that national restrictions have now been largely lifted, we are still keen to keep our staff and customers as safe as we can

Before the course

1. To make the course as safe as possible we encourage you to carry out a lateral flow test 48 hours before the course. If you get a positive result please let us know immediately and we will refund your fee.
2. Please do not come on a course if you think you have any Coronavirus symptoms or have received an alert from NHS track and trace within 14 days of the course.

During the course

We will ensure:

1. We will remain outside for as much of the course is possible and ensure as much distance is maintained between attendees as possible.
2. We will limit sharing of any equipment between attendees, which means we will not be able to lend out hand lenses etc. We will also provide one central hand sanitising station.

What we will ask of you:

1. We recommend you bring your own hand sanitiser.
2. Please wash/sanitise your hands regularly during the day.
3. Please bring a mask and wear it in any indoor spaces (toilets, snack shop, pub etc.)
4. Bring your own drinks and food.

After the course

1. Please inform us as soon as possible if you develop symptoms of and/or test positive for C19 in the 14 days after your course.
